Experience:

2018 > Javascript developer @ NoBears (DCG)

Working as a front-end javascript developer in a web-development office creating both websites, web-apps and hybrid javascript apps for clients both small and large.

- Ionic-Angular, typescript, Vuejs, Nunjucks, Twig, Testcafe
- Working with multiple projects

2016 -17 Front-end developer @ Planon Software

Working as a front-end developer in various teams to build the office and facility management software called 'Planon'. Mostly worked on a cad-viewer plugin to display and use construction drawings inside the Planon-application.

- AngularJS, typescript, snap.svg
- Working in a professional environment

2015 Game Design Intern @ Games [4 Therapy foundation]

Created a playfull application in Unity (C#) for children in therapy that will replace their paper-based assignments and help them become more motivated to participate in therapy. This was a graduation internship.

- Data encryption
- HTML, CSS and Javascript
- C#

2014 - 15 Designer/ Developer @ StoryLine

Created a fluid web application for sexual abuse and assault victims to help them visualize their story, rather than having them tell their story. Awarded second place at the ICTalent awards 2015.

- Data encryption and working with doctor-patient confidentiality
- Responsive HTML pages
- Handling incomplete and wildly varying data

2013 – 14 Game Design Intern @ Montpellier Venture
@ REshape Center, Radboud umc Nijmegen
@ GGZe Eindhoven

Designed a game concept for hearth patients at the Radboud umc hospital which kept track of nation-wide AED locations. Created a HTML prototype for this game concept as well. Secondary role as an intern was to handle and incoming requests from the medical staff and design solutions for these problems.

- Responsive HTML cards for use on Google Glass
- Data transport between a MySQL database and the Android Google Glass application
- Application and data testing

2013 > Freelance web designer/ developer

Creating small scale HTML websites for small businesses and self-employed with custom PHP backhands for basic data and page management.

- Responsive HTML pages
- HTML page templates using MySQL database data
- Basic form security using PHP
- Basic site backhands using PHP and MySQL

Education:

2011 – 15 Fontys University of Applied Science (Bachelor degree)
